## WHISTLERS MOUNTAIN

The Whistlers Mountain summit is one of Jasper's most accessible alpine environments. Discover this pristine landscape along with the plants and wildlife specially adapted to living here. Jasper SkyTram, Friends of Jasper National Park and Parks Canada work together on maintaining this unique environment. We invite you to enjoy the summit, seek out our **REDCHAIRS** and take an extra moment to appreciate the stunning mountains views that surround you!

When visiting this fragile alpine area; we encourage you to leave only footprints, take only pictures and keep to the designated trails leaving no trace of your visit!

With your help, we can continue to protect this amazing area and leave it pristine for future visits, again and again.
